HILLS SVL Training Programs

Crestron DigitalMedia Sales hit 6,000 Systems with over 60,000 devices now connected!

There are now more than 6,000 Crestron DigitalMedia™ systems installed worldwide and over 400 systems supplied in Australia and New Zealand in the past 12 months.

Crestron has made signal and content management a big part of its business for many years and the success of DigitalMedia shows real market leadership through high-level investment. Crestron provide the only complete managed digital transport solution with the bonus of seamless Crestron control integration and Quickswitch HD™ for fast glitch free switching.

Crestron DigitalMedia is now into its second generation with the recent release of the true one-wire Digital Media 8G™ range providing the industry's first ever 8 Gigabit AV with Control Network. Available in a Single Multi-Mode Fibre and Single 8G UTP cable providing managed control and signal transport up to 330 metres (8G Fibre) without repeaters.

Crestron DigitalMedia systems accept everything from Composite Video, Component Video, Ethernet, Control, Display Port, and SDI and of course HDMI, with a local HDMI monitor output provided individually for

all input signals. Another Key DigitalMedia benefit is the powerful Audio DSP features providing excellent system flexibility and highly audible sound even in professional spaces running multi channel sources and mono sound reinforcement.

The Australia and New Zealand DigitalMedia Certification program (DMC) is now fully booked until the end of the year, with the industry quickly recognising the challenges of the digital world and the need to be Crestron DigitalMedia Certified for success. By the end of 2010 there will be over 72 local specialists from the industry with DMC-E certification and 96 will also be DMC-D certified.

FlowWorks! Helping you make the most of your QOMO Interactive Displays

Combining FlowWorks! with QOMO interactive products will help teachers create more dynamic lessons. This will increase the students' rate of retention because they are being stimulated by the content!

Display FlowWorks! on the 88" 4:3 Infra Red interactive whiteboard.

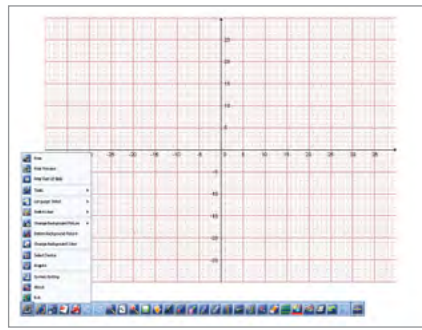

Figure 1 At the touch of a finger open files, print, save, edit and email.

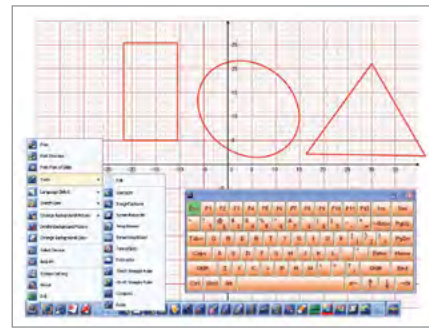

Figure 2 FlowWorks! has many built in tools to assist teachers with building your presentations.

There is no shortage of choice when it comes to deciding which interactive products to include in a teaching space. In recent years the education market has been inundated with exceptional products designed to not only assist with delivering a message to students, but also to assist these students in retaining information by being more involved.

One of the difficulties in achieving this is the ease in which these technologies can be used. Unfortunately, there have been many products introduced to classrooms that are not being used to their full potential, primarily because they are too difficult to use or teachers are apprehensive, as they do not fully understand its capabilities.

Enter FlowWorks! This is the annotation software included with each and every QOMO interactive product, including their award winning Interactive Whiteboards through to their Tablets and Document Cameras.

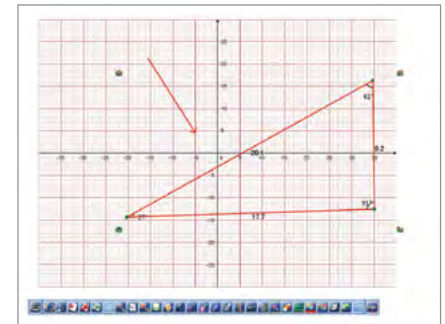

FlowWorks! is the driving force behind the success of these products, and the best thing about it is that the majority of users have the advantage of teaching themselves the software simply by using it. It's just a matter of having a go!

FlowWorks! has been designed by teachers, with teachers in mind. With FlowWorks! teachers will never have to be reluctant to use these new technologies again.

Figure 3 The intelligent pen allows a user to draw perfect shapes with its self-adjusting feature. Simply draw a swirl or triangle and FlowWorks! will do the rest. Turn this...

Figure 4 Into this.

Stegos Wireless Boundary Microphones from Beyerdynamic

Perfect for those projects where drilling cable holes through that expensive table is not an option.

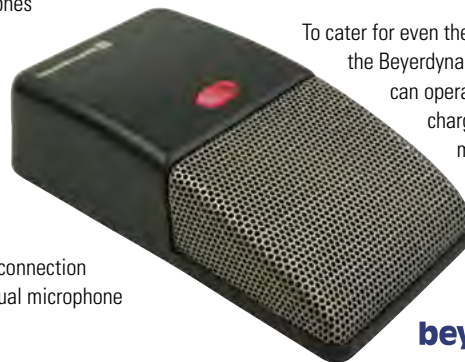

Beyerdynamic Stegos microphones are also perfect for temporary or changeable setups. Simply place the desired number of microphones on the table and it's ready to go.

Beyerdynamic Stegos is a wireless boundary microphone system designed for video conferencing and boardroom applications.

Up to four Beyerdynamic Stegos microphones can operate from one receiver. A large system could include up to 12 Stego's microphones with three receivers. The included Stegos software allows easy system fine-tuning as well as remote control and integration with third party control systems, such as Crestron. The Stegos receiver features an XLR, terminal strip and 3.5mm output for connection to any video conferencing system. Individual microphone outputs are also available.

Beyerdynamic Stegos operates in the 2.4GHz band using Direct Sequence Spread Spectrum (DSSS) offering high immunity from interference. Stegos also employs 128bit encryption ensuring privacy and security.

To cater for even the longest meetings, the Beyerdynamic Stegos microphones can operate for 14 hours between charges and feature a maximum charge time of only 2 hours.

New Mipro MA708 Portable PA System

Slotting in nicely between the MA707 and MA808, the all new MA708 delivers unparalleled audio performance and innovative features.

The Mipro MA708 is a new addition to the Mipro Portable PA line-up, comprising a 120 Watt amplifier driving an 8" woofer and a 1" compression driver.

The combination of high output and a true 2-way speaker system makes the Mipro MA708 perfect for performance and music applications. The amplifier is a high-efficiency class-D, providing up to 7 hours of continuous use from the integrated battery system.

Four models are available and these can be optioned up as required. The base unit includes a cord microphone whilst the top of the range includes a CD/MP3 player and wireless microphone receiver.

The Mipro MA708 incorporates some of the most popular features of the larger MA808, including the ability to support up to four wireless receiver modules, a rear panel "fuel-gauge" for battery status, an optional wireless interlinking module, plus a switchable "voice-priority" feature.

The MA708 is perfect for applications including schools, corporate multimedia presentations, tradeshows, auctions, funeral services, weddings, shopping centre presentations, special events, lectures, and political campaigns.

MIPRO

Luxury Yacht, Crestron Style

The Warren S120 is the most phenomenal in the Warren Sport Yacht series. An awesome visual profile of a yacht beautifully proportioned with luxurious interior design.

Sydney-based Crestron dealer CHM Electronics worked closely with the owner of Warren Yachts who liaised with the ship builder and the Captain, constantly ensuring requirements were met throughout various stages of building the vessel.

The audiovisual installation is very comprehensive with 5.1 surround sound in the main saloon and master bedroom, plus 55 additional audio zones and another 10 video zones, all overseen by Crestron control.

In addition to audiovisual systems, the CCTV, blinds, navigation and access door controls are all interfaced and Crestron controlled. The main saloon features a TPMC-8X 8" wireless touchpanel driving a Meridian theatre system, while no less than nine TPMC-4X wireless remote controls are used throughout the rest of the yacht. A second TPMC-8X drives the master bedroom surround system. The touchscreens were custom designed to suit the client's preference.

Those lucky enough to ride aboard this vessel can dock their iPod or iPhone into any of seven Crestron CENI-IDOCV iPod docks for playback through the system. CHM even integrated a TPS-4L touchscreen into helm station to control blinds and local audio.

"The commissioning of this project Warren S120 came with the premise of high expectations synonymous with the yacht's prestige" says CHM founder, Guy Currenti. "Admittance of 'no solution' was not an option and we did not relinquish any part of the project because of difficulties. It was always the case that we were well prepared and would design and custom build solutions to suit. It was greatly appreciated and the owner and his family were overwhelmed by sound quality and the ease of use."

CHM Electronics won the "Highly Commended" award in the "Best Marine Project" category at the prestigious CEDIA Electronic Lifestyles® Awards in Melbourne this year.

New Hills SVL Training Programs

The new SVL Training Programs have been uploaded to the Hills SVL website. This includes the new Crestron Digital Media Certification Programs. For more information please head to www.hillssvl.com.au where you can register online. Courses available include:
