Control Panels

Australian Monitor AV Revolution REVOLUTION SERIES DSP

Available now, the AV Revolution from Australian Monitor has been over four years in development with our aim being to produce a DSP platform that is feature packed, yet simple for the installer to set up and integrate.

We wanted an intuitive solution that was easy for an end user to control, and had the processing power and flexibility required for the vast array of applications facing today's audio contractor. We also wanted to give the market all the peripherals needed for a simple and complete installation.

Designed for all applications from boardrooms, lecture and training theatres through to room combining and hospitality applications, the AV Revolution combines cutting edge DSP processing power with simple and flexible design software and intuitive and easy to operate control options.

The AV Revolution boasts the comprehensive sound processing you have come to expect from a state of the art DSP processor, but is also very simple to set up and can be controlled via the end user GUI incorporated into the software suite, via a third party control system such as Crestron or via the beautifully designed and cost effective Australian Monitor ICON CP Control Panels.

The AV Revolution represents a great step forward in DSP solutions and soon you will see even further Revolution Series DSP solutions from Australian Monitor, including digital amplification.

AV Revolution features include:

- 3 stereo output zones
- 2 mono output zones
- 6 stereo line sources available to all five output zones
- 4 microphone/line switchable inputs available to all five output zones
- Support for a range of remote control panels (RS485)
- Ethernet control of audio parameters for third-party control system interfacing
- 'Master override' input (microphone/line input 4) with logic triggering to override zone mixes
- Ability for stereo zone outputs to be mono summed, allowing up to two uniquely processed outputs per zone
- Various EQ, dynamics and delay processing on inputs and outputs
- Simple setup using configuration software
- Integrated user GUI
- Front panel input/output signal present indication

NEW Crestron Quickpack™ Complete Classroom AV Solutions

Crestron QuickPacks are complete classroom presentation systems that are simple to install and easy to use. QuickPacks come with all you need to get a presentation system in any classroom up and running; no programming or training required.

Crestron QuickPacks feature basic system control with AV switching, audio amplifier, speakers, wall plates, mounting hardware and cables. Simply add your choice of video projector, screen and AV sources; the software wizard guides you through setup in just minutes. With simple, labeled button presses, instructors can power on the projector, choose the video or computer source and adjust the volume.

- Provides a complete, easy-to-install multimedia projection system
- Delivers a flexible, low-cost solution that's simple to purchase
- Integrates seamlessly with RoomView™ help desk software and RoomView Connected™ projectors
- Powered by the 2-series MPC Media Presentation Controller™
- Provides an easy-to-use, customizable pushbutton control panel

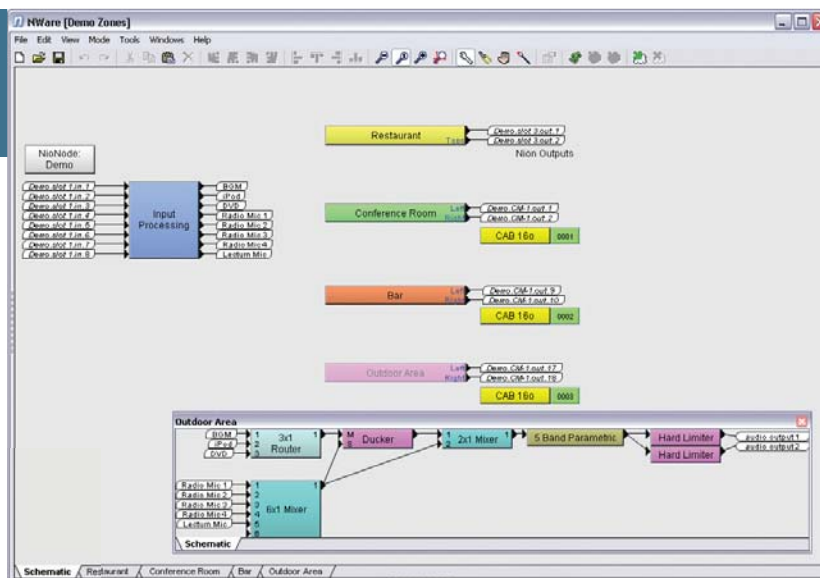

- Includes high-performance speakers, amplifier, and input wall plates
- Includes a very versatile, low-profile universal projector mount
- Includes all required cabling, connectors, and power supplies
- Three Pack Options providing 2, 3 or 4 Multimedia system inputs (QP200, QP300 & QP400)
- Enables campus-wide monitoring and management via RoomView
- Provides a gateway to complete room control (lighting, occupancy sensing, etc.) using the industry's most powerful and secure IP-based control platform

Expanded NION NX32

Now with four module slots!

- Entry level NION now with four module slots (up from two)
- Same competitive price
- Up to 32 channels direct into rear panel (16x16, 8x24, 12x20, 28x4 etc)
- Integrated CobraNet or Dante port – an additional 32x32 channels
- All NION software features including scheduling, wave files, logic, GPIO port, KIOSK

NEW Rane AM1 Automixer

- 4 channel gain-sharing automatic mic mixer
- Manual line mixer with dual RCA, 3.5mm and USB I/O port
- Expandable up to 60 gain sharing mics by adding seven Rane AM2's
- Can operate as a Rane Mongoose RAD for connection via CobraNet to third party DSP systems.
- USB port for charging MP3 player
- Appears in Windows and Apple OS X computers as a standard USB Audio Device, compatible with dozens of audio recording and playback audio applications.
- Simple to operate and perfect for multi-mic and line source mixing in applications such as panel discussions, multi-media presentations, conference rooms and boardrooms

NEW Rane AM2 Automixer

- 8 channel gain-sharing automatic mic mixer
- Expandable up to 64 gain sharing mics by linking eight units
- Add line inputs and USB connectivity by linking to an AM1
- Can operate as a Rane Mongoose RAD for connection via CobraNet to third party DSP systems.
- Simple to operate and perfect for multi-mic applications in churches, boardrooms, courts, panel discussions and conference rooms.

Australian Monitor IN600 5.1AV now with ICON Control Panels

Complete AV room control with mic/line mixer in an affordable package

- 4 x XLR microphone/line and RCA inputs
- 2 x DVD inputs featuring VGA (component), composite video and 5.1 RCA audio
- 2 x AUX inputs featuring composite video and stereo RCA audio plus 2 x PC inputs featuring VGA video and stereo RCA audio
- 6 x Balanced XLR outputs (5.1 out), sub output features 24dB/Oct LPF at 120Hz

- VGA/Composite video select switch on rear panel for DVD1 and DVD2 -
- 1 x Composite video and
- 1 x VGA video output

Projector RS232 control to allow for switching between composite and VGA sources

Projector POWER ON/OFF control from front panel (complete projector management) plus screen up and screen down external logic control.

Icon CP can now give remote control of mic, AV sources and projector management.
